*Awarded to individuals who are not current members of the Ontario Chapter and who through their own personal efforts, promote and advance the ideas of arboriculture and urban forestry within Ontario.*

*Note: This award can only be conferred once to any individual*

## Criteria

- 1. Not a Current Member of the ISAO.** *The nominee must be validated as not a current member of the ISAO by the ISAO. Please check with the ISAO prior to submitting a nomination.*
- 2. Personal efforts to promote and advance the ideas of arboriculture and urban forestry within Ontario.** *It is expected that these efforts would be noteworthy; that they would stand out as extraordinary. Describe this individual's personal efforts to promote and advance the ideas of arboriculture and urban forestry within Ontario over the past 6 to 10 years. This should be a detailed listing including over what time period what efforts were involved.*
- 3. Promote the ideas of arboriculture and urban forestry within Ontario.** *"Promote" is meant as "to further the growth, development, establishment, progress or public knowledge and opinion of." Describe this person's activities to "further the growth, development, establishment, progress or public knowledge and opinion of" the ideas of arboriculture and urban forestry in Ontario. This should include a listing and description on this person's achievements – on how they "promoted" the ideas of arboriculture and urban forestry in Ontario and what their achievements were. It is noted that the influence of promotion is hard to measure; and therefore, an emphasis on the promotional activities themselves is considered acceptable.*
- 4. Advance the ideas of arboriculture and urban forestry within Ontario.** *"Advance" is meant as "to move forward" and "to progress." In other words, "advancing the ideas of arboriculture and urban forestry" would involve developing and/or encouraging the adoption of ideas and practices that improved the practice of arboriculture and urban forestry. Provide a listing and description on this person's achievements – on how they "advanced" the ideas of arboriculture and urban forestry in Ontario and what their achievements were. Endorsements by others may, and should be submitted as additional evidence of the worthiness of the nominee. A diversity of endorsements, including but not limited to community endorsements (residents, businesses, elected officials) and that of accepted experts (public and educational institution representatives, landscape architects; arborists, environmental experts, etc.) will strengthen applications.*
